

Safety Data Sheet

Profi Light Nr. 123001

Extra Safety by way of automatic blade retraction

Use:

The Profi Light is a GS-tested, versatile and universal safety knife. In addition to its outstanding cutting characteristics for all normal cutting jobs (such as, for example, opening cardboard boxes), it impresses with its functional and prize-winning design.

For example: Blade retraction; the user simply removes his or her thumb from the slider while cutting – after leaving the material being cut the blade automatically retracts into the handle (DBL technology). For example: Material; abrasion-resistant plastic ensures durability and stability. For example: Weight; at only 44 grams the Profi Light is a lightweight among knives.

For example: Blade change; this function practically „at the touch of a button“.

Example of use:

Blade change:

The simple and comfortable blade change can be done by the push of a button. This patent pending technique allows a controlled, smooth and safe blade change and also prohibits automatically the overstretching of the retraction spring.

Mounted Blade:

Profi Light No.	Description-pic.	Order-No. Blade	approx. Material-Thickness	approx. Width x length
123001	Allfit-Blade	5232.70	0.63 mm	19.00 mm x 53.00 mm
				
All dimensions are approximate data!				

Packaging:

Packed 1 in single unit box =
Order-No. 123001.02

Dimensions product:

Dimensions L x W x H (mm): approx.. 140 x 30 x 15
Weight (g): 44

A instruction manual in various languages is enclosed.

Certificate:

Certificated by the German Safety Control Board:
TÜV Rheinland LGA Products GmbH, Tillystraße 2, 90431 Nürnberg

Certificate No. S 60033010

Date of issue: 09.12.2010 (day/month/year)
Tested acc. to PA 80-2.1.1/03-07
ZEK 01.2.-08/12.08

Security advice:

To ensure that you use your new MARTOR knife safely and most effectively, please read and note the following user-instructions. Please keep the written guide in a safe place so that you can access it at any time.

1. General Application Instructions:

Please use the product carefully for cutting work only and not for any purposes other than those that are intended. **Please take the correct handling and the proper use of the knives into account in this regard.**

2. Special Application Instructions to Avoid the Danger of Injuries:

Only use knives that are in perfect condition and have sharp, clean and undamaged blades. Employ the utmost care when handling the knives. Caution: The blade is sharp and can result in serious and deep cuts. Therefore, never reach into the blade!

To reduce the danger of injuries, hold the hand that is being used to restrain and stabilise the cutting base in such a manner that the restraining hand or even other body parts are not endangered in the event that the knife slips. .

3. Replacement of spare parts:

Replace any blades that become dull at the right time! Use only the replacement blades available at MARTOR for this purpose.

Dispose of old blades in a proper fashion. They should not be placed in a waste paper bin, as this poses a considerable danger of injuries.

Never perform any repairs yourself. If the knife displays signs of aging or other wear, e.g. function problems when changing the blade or in the handling of the blade pushers, then it must be rejected and replaced with a new one.

Any modifications or manipulations to the product are prohibited, as they impair the product safety. **Caution: there is an extremely high danger of injuries here!**

4. **Non-use of the knife:**

Always secure the blade in such a way that injuries due to cuts are excluded. Store the knife in a secure place.

Care instructions

Always keep the knife clean and do not expose it to unnecessary humidity to safeguard a long service life.

This knife does not belong in the hands of children!

CAUTION: No liability will be assumed for consequential losses. Subject to technical changes and errors!

The Dispenser is the safest place to store new blades - before they are taken out and fitted in the safety cutter.

Important:

Replace blunt blades with sharp ones regularly because otherwise you will have to keep increasing the pressure on the knife to cut through the material.

This also increases the force with which the blade may cut you in the event of an accident.

Waste management of used blades:

To minimise the risk of injuries during disposal of used blade, we recommend the use of the MARTOR Safebox No. 108000 and the Used Blade Container No. 9810.

Used blades should never be dropped in a waste bin - they should be stored in the MARTOR Safebox, a simple innovation for the storage and disposal of used blades. The Safebox will fit in any coat or trouser pocket.

The Used Blade Container is for the collection and disposal of the used blades previously stored in the Safebox

Useful Accessories:

Holsters keep your safety cutters conveniently ready for use and are a highly recommended accessory. When cutters are used correctly, injuries from cuts in the workplace become a thing of the past. Safety mechanisms protect your hands and body from inadvertent contact with the blade.

Holster No. 9842

Small Belt Holster made of plastic. Ideal to have your MARTOR SAFETY Cutters readily (and safely) to hand at all times.
